

# JACK-PLATE™

“When you’ve got to get through”

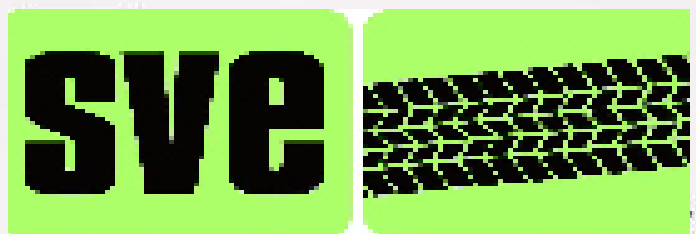

Let's face it! Your crews hate to use the Pole Jack because it's heavy, you've got those hydraulic lines to slug around, and then when you try to lift the pole, the Jack just buries itself into the ground.

That's why we made the Jack-Plate. Lightweight fiber mat panels flex to spread the load but don't break. Made to fit Distribution and Transmission poles. Adaptable to any Pole Jack.

Jack-Plates pay for themselves on the first job. It's the time "not" wasted trying to get a good set-up on the Pole Jack. It's the Derrick turntable that "doesn't" break trying to pull a pole that won't come out.

- Easy to use — Fits any jack — Fits any pole
- Lightweight — 26 lbs.
- High strength fiber mat construction
- Flex but doesn't break
- Saves crew time
- Stops damage to Digger Derrick
